ABOUT ME

Junior Developer with hands-on experience building modern web applications through maintainable code, collaborative development, and AI-assisted workflows using Codex.

CORE SKILLS

- Languages – JavaScript, TypeScript
- Database – SQLite, Postgres, MongoDB
- ORM – Prisma, Drizzle
- Frontend – React, Tailwind, shadcn/ui, daisyUI
- Backend – Node.js, Express.js, NestJS
- Tools – Git, Codex

PERSONAL PROJECTS

Nova

Restaurant POS System

- Built a Tauri-based POS desktop app for cashier and admin operations, currently in development.
- Implemented cashier workflows and role-based login to speed up transactions and shift handoffs.
- Used Codex to support implementation, iteration, and development workflows.

Kaizer

Desktop Music Player

- Built a cross-platform desktop music player integrating multi-provider search, streaming, downloads, and local persistence.
- Implemented Electron IPC workflows, SQLite-backed state management, and fallback logic for offline playback and provider reliability.

Resume Makinator

Resume Builder

- Built a browser-based resume builder with structured forms and live PDF preview.
- Implemented client-side state persistence and import/export to save and restore resumes.

EXPERIENCE

Software Developer

November 2025 - Present

TerniLabs

- Contributed to web application features using modern JavaScript frameworks.
- Collaborated on code reviews and feature iteration.

Deck Cadet

September 2022 - July 2023

Career Philippines Shipmanagement

- Worked in high-pressure, safety-critical operations requiring discipline and precision.
- Communicated effectively within multicultural teams and followed structured processes.

CERTIFICATES

- Responsive Web Design, Front End Libraries, Back End APIs (v8)
freeCodeCamp
- CS50x, CS50W
HarvardX

EDUCATION

Completed Classroom Instruction in BS Maritime Transportation

July 2018 - September 2021

Asian Institute of Maritime Studies
